

LONGVIEW

The acquisition agent that waits for the truth.

NAYL (AI Media Global) and Vincent

Built with Nimble, Liquid AI and Tinybird

the click

the truth

DAY 0

DAY 30

Ads are judged on day one.
Customers arrive on day thirty.

Busy buyers answer late.

Fast responders dominate early data, so dashboards and naive agents learn the wrong lesson.

01 Keeps every experiment open until the truth arrives.

Outcomes are tracked to day 30, not judged on day 1.

02 Remembers what it believed, and why.

Every belief is versioned with its evidence.

03 Changes its mind with receipts.

Each revision carries a diff against the last one.

04 Corrects its own decision rules.

A lesson raises the policy version.

Built for day thirty, not day one.

Ledger

BITEMPORAL, IDEMPOTENT

Every event knows when it happened and when we learned it. Replays change nothing.

Commitments

PROMISES ACROSS TIME

The agent schedules its own follow-ups, then wakes up to keep them.

Beliefs

VERSIONED, GATED, DIFFED

A gate decides when evidence is enough. No winner on thin samples.

Crash-safe runs

CHECKPOINTS, EXACTLY-ONCE

Kill it mid-run. It resumes from the last checkpoint, with no repeated effects.

Plus a time machine

scrub to any day and see exactly what the agent knew then

DAY 0

DAY 30

Watch it change its mind.

OPEN THE LIVE DEMO

/demo

Stage bar: Next beat, Pull the plug, Resume, Replay webhook. Then drag the time machine.

- 1 DAY 0 Launch
- 2 DAY 3 The dashboard says A
- 3 DAY 6 Busy buyers answer
- 4 DAY 9 The agent changes its mind
- 5 DAY 11 Late truth
- 6 DAY 14 Pull the plug
- 7 DAY 21 Outcome
- 8 ANY DAY Time machine

One wake-up, seven checkpointed steps.

Seven properties, each checked by a test.

- ✓ Replay a webhook: nothing changes.
- ✓ A late event restates the past.
- ✓ Unknown budget stays unknown.
- ✓ Unknown attribution is never credited.
- ✓ Crash mid-run, resume: zero duplicate effects.
- ✓ No winner on thin samples.
- ✓ The time machine reproduces what the agent knew.

The engine is pure, deterministic TypeScript. The same code runs in the tests, on the server and in the browser.

For businesses whose buyers take their time.

FIRST CUSTOMERS

Service businesses with considered purchases: AI implementation firms, agencies, B2B services.

We run it on our own pipeline first.

WHAT IT DOES NOT DO

It does not buy ads, send messages, or promise results.

EARLY ACCESS

\$299

per month, per business

Ad spend separate.

Your dashboard remembers the click.
Longview remembers what happened next.
